TECHNICAL SKILLS

Languages: JavaScript(ES6+), TypeScript, HTML/CSS
Frontend Technologies: ReactJS, React-Native , ReduxJS, ViteJS
Backend Technologies: NodeJS, ExpressJS
Databases: MongoDB
Testing: Jest, React Testing Library
Cloud & Tools: AWS, Git, GitHub, GitLab, SonarLint, Agile/Scrum

EXPERIENCE

COGNIZANT TECHNOLOGY SOLUTIONS

Feb 15, 2022 – Current

Takeda Pharmaceuticals

Jun 25, 2025 – Current

- Upgraded **AWS Lambda** runtime from **Python 3.9** → **3.13** using **GitHub Actions** CI/CD (YAML updates), validated layer compatibility, and monitored deployments via **CloudWatch** Logs.
- Modernized and secured three React applications by upgrading all **NPM packages** to their latest stable versions, addressing security vulnerabilities and ensuring dependency compatibility.

Ace Hardware (Micro Frontend Application Development)

Jul 30, 2024 – Jun 10, 2025

- Built 3 micro-frontend applications using **React (rendered with React Native WebView)**, **React Storybook**, **Styled Components**, and **TypeScript**, ensuring design consistency across teams.
- Led a **2-member team**, optimizing software solutions and conducting thorough code reviews to ensure high-quality deliverables.
- Implemented **Redux + Redux Persist** for efficient state management and data persistence & integrated UI height adjustment using **Custom React Hooks** for keyboard overlap in the **React Native WebView** environment.
- Improved performance with **lazy loading & pagination (Intersection Observer)**, reducing initial load time by **30%**.
- Integrated advanced **Filter & Sort Functionality** & developed validations in two microfrontend apps, ensuring code quality with **SonarLint** and **Checkout API** integration for carts.
- Optimized navigation between two microfrontends, worked on shared components, added them to **React Storybook & GitHub Copilot**.

Kentucky's Fried Chicken (KFC PWA Development)

Feb 15, 2022 – Jul 15, 2024

- Contributed to the development of **KFC's Progressive Web App (PWA)** and used **NodeJS** and **ExpressJS** to deliver efficient **RESTful APIs**, improving the user experience across multiple markets.
- Integrated **Internationalization (i18n)** with **react-i18next**, supporting multiple languages and locale-specific formatting.
- Leveraged **Contentful** to manage image assets for efficient integration & utilized **React-Redux** for **state management**, ensuring efficient data handling and converted UI Mocks from **Figma** into responsive and interactive components
- Led the **integration** and **merging** of login codebases for four key markets: **Australia, Canada, South Africa, and Japan**, ensuring **100%** functional parity
- Reduced code smells within **50K+ lines** in **KFC PWA** by **75%**, improving the app's maintainability, readability, and overall performance.

PROJECTS

Taskify | [URL](#) | *ReactJS, NodeJS, ExpressJS, MongoDB*

June 2023 – Present

- Developed a **full-stack task management web application** & implemented **RESTful APIs** for task operations including creation, editing, completion toggling, and deletion, ensuring seamless client-server interaction.
- Built dynamic task filters and views** — All Tasks, Open Tasks, and Completed Tasks — using conditional rendering and real-time state updates.
- Integrated an interactive task form component** to add new tasks with title, description, and completion status, improving user productivity and experience.

EDUCATION

Government College of Engineering and Research

Bachelor of Technology

Pune

Aug 2017 – Jul 2021
